rafaideenmuhammadaflalmuhammed@gmail.com

Profile

Motivated and detail-oriented Software Engineering student currently pursuing an HND in Computing, with a strong interest in C# application development and database-driven software solutions. Possess practical knowledge of C#, .NET, SQL, MySQL, JavaScript, HTML, CSS and Visual Studio, with experience developing software projects involving database management, user interfaces and system functionality. Strong understanding of object-oriented programming, SQL queries, database design, debugging and problem-solving. Eager to apply technical knowledge in a professional development environment, contribute to high-quality software solutions and continuously develop expertise in C#/.NET application development, MySQL, APIs and enterprise software systems.

Education

HND in Computing (Software Engineering) Oct 2025 – Present
Esoft Metro Campus *Batticaloa, Eastern Province*

Diploma in Information Technology Jan 2025 – Sep 2025
Esoft Metro Campus *Batticaloa, Eastern Province*

Projects

Pharmacy Inventory Management System - Ongoing | C#, .NET, SQL Aug. 2026 – Present

- Currently developing a database-driven pharmacy inventory system for managing medicines, suppliers, stock levels and inventory records.
- Designing and implementing CRUD functionalities for adding, updating, searching and managing medicine information.
- Developing database operations using C# and SQL to improve inventory tracking and efficient data management.

Automated Gym Fee Calculation System | C#, .NET, SQL Server Apr. 2026 – May. 2026

- Developed an automated system for calculating gym membership fees based on membership plans and customer details.
- Implemented membership management, fee calculation and payment record functionalities.
- Applied C# programming and database concepts to improve calculation accuracy and reduce manual processing.

Restaurant Order Management System | C#, .NET, SQL Apr. 2026 – May. 2026

- Developed a restaurant management system for handling customer orders, menu items, and order information.
- Implemented order processing, menu management, quantity handling and automated bill calculations.
- Used C#, SQL and Visual Studio to develop database-driven application functionalities.

Billing System for Hardware | C#, .NET, MySQL Jan. 2026 – Feb. 2026

- Developed a billing system for managing hardware products, customer transactions and billing records.
- Implemented product selection, quantity management, total calculation and bill generation functionalities.
- Applied C# and database development concepts to create an efficient and user-friendly billing solution.

Technical Skills

- **Languages:** C#, SQL, JavaScript, HTML5, CSS3
- **Frameworks:** .NET, ASP.NET, Bootstrap, Tailwind CSS
- **Databases:** SQL Server, MySQL
- **Tools:** Visual Studio, VS Code, Git, GitHub, Postman, Figma
- **Development:** OOP, CRUD, REST APIs, Debugging, Troubleshooting

Core Competencies

- Communication
- Teamwork & Collaboration
- Problem-Solving
- Time Management
- Adaptability
- Willingness to Learn
- Attention to Detail
- Critical Thinking
